Viewpark glen is an important habitat for deer, ducks, herons as well as homing bugs and beetle species within the forest ecosystem. In the event that the Glen is destroyed further will have a great impact on all as well as homing birds. The Glen as a space is also provides a green space for being within nature - nature is diminishing further and further away from us therefore is crucial that we keep this in place. Nature provides its own learning environment for old and young, to play, to learn and enjoy-

the glen is of great historical importance, but also has a lot of wildlife whose natural habitat is being destroyed. the glen should be turned into a historical park with walks for the kids so they can learn about plants and animals.

6/5/2015 12:30 AM

The council taking the lead and realise it belongs to the people not the council. Improved pathways around the glen or footbridges to increase accessibility. Dedicated bike trails (in hope that it may encourage bikers and cyclists to stick to set areas reducing damage).

The Estate would need to generate income in order to continue in the long term, can you think of any opportunities or offer any suggestions as to how we could do this?

Please do not create jobs for the glen other than Rangers, Upkeep and protection of species which reside there. It would be regretful to make the glen anything other than just a natural space. If income is a must - be creative with your thinking - tree top cabin overnight with payment, You could have a ranger where schools pay to be taken round

the glen and carryout field activities - (See plant life) as an example. With the decline of honey bees etc you could also use this example to plant flowers with kids to help stop the incline.

I have been born and grew up in VP. Love our village. Very proud of the Glen. . Only really appreciated it as an adult. . Never knew any of the history. . Till last few years. Shamed By the destruction of many of the beautiful trees and wildlife habitats. .. it would be good to get safer walking paths.
